Applicant

SIEBEL SYSTEMS, INC

1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

2. CITATIONS AND EXPLANATIONS

Claims 1, 10, 18, 21 lacks inventive step under PCT Article 33(3) as being obvious over Ferrel et al (US patent 5,907,837). Ferrel teaches as an example, users of Multimedia Publishing System (MPS) titles are able to search within title content for items that match a text expression (see at Fig. 22, col. 39-43). Thus, it would have been obvious to one ordinarily skilled in the art at the time of invention to provide a search center pan with search category from a drop down list of search categories.

Claims 2-9, 11-17, 19-20, 22-29 lacks inventive step under PCT Article 33(3) as being obvious over Ferrel et al (US patent 5,907,837) and in view of Beck et al (6,167,395). Ferrel does not teach association criteria. However, Beck teaches a search function that searches accessed data for association criteria (col. 4, line 59 to col. 5, line 29). Thus, it would have been obvious to one ordinarily skilled in the art at the time of invention to provide a search function for associated criteria. It is essential to search internet databases for associated criteria data rather than searching simply using keywords.
